

STM-W/O

Water/Oil heater

LCD control panel
makes it easy for users
to input temperature parameters
and integrate P.I.D. values
to ensure precise temperature control

Vacuum mode
usage of reverse pump
running to stop small leaks

Water pump
turbo pump to provide a power
source for water circulation
between mould and STM

Heating/cooling tank
Programmable heating capacity in:
3 kW, 6 kW, 9 kW via HMI
